QUICK MACHINES FOR QUALITY BOOKS

Complete range of machines for the production of books, both in hard and soft cover. Designed for short and medium runs, they are ideal for the "book-on-demand" and digital print finishing processes, for short-run bookbinding and for lay-flat photo-books.

Advantages

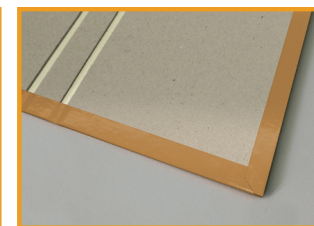

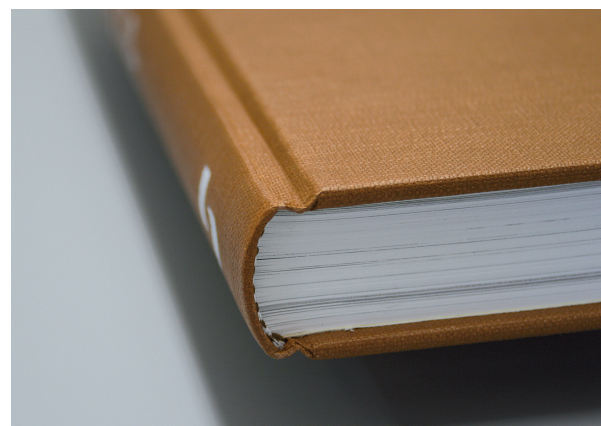

Versatile and compact
Machines always ready to use
Ideal for short and medium runs
Suitable also for big size productions
Many models are available to complete the working process
Thanks to the ease of use, they do not require skilled personnel

History and Future of Bookbinding
CMC ITALIA manufactures machines for Bookbinding and Paper Converting since 1937, constantly renewing its experience in designing state-of-the-art production systems.

Italian Design and Manufacturing
Made in Italy means quality and tradition. Ensuring the highest standards in production processes CMC ITALIA chooses high quality components to offer reliable and profitable machines.

Q-COVER CASEMAKERS

48x70cm - 48x110cm - 70x110cm

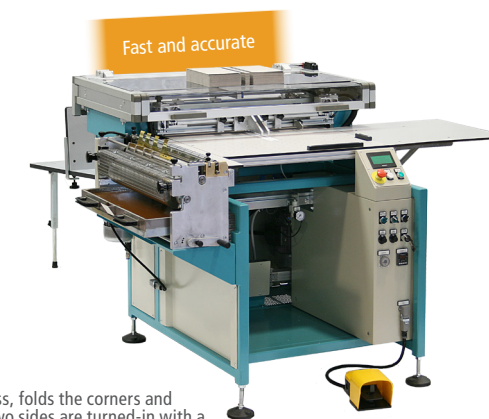

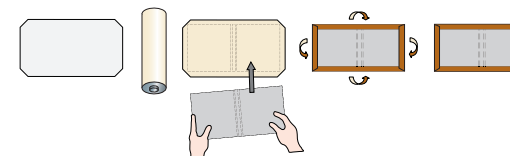

Casemakers for short and medium run production of binders, book covers and paper-over-board items. This one-operator productive units fit into confined space, they are always ready-to-use with fast to no setup time.

- Fits into confined space
- One operator only
- Fast or no setup
- Precision and quality are guaranteed
- Practic versatile and always ready-to-use

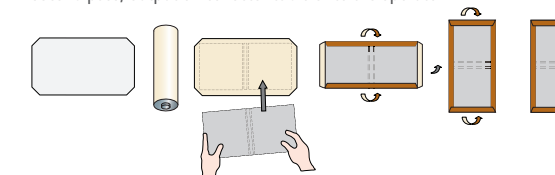

Q-COVER FOUR

It turns in all four sides in one pass. Output on collector table at the side of the operator for an immediate view of the finished product.

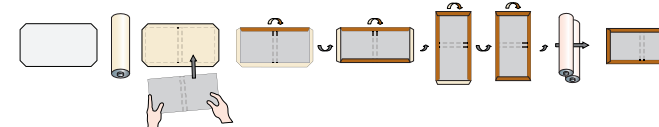

Q-COVER TWO

It turns-in two sides in one pass, folds the corners and presses the cover. The other two sides are turned-in with a second pass, output on collector table or to the operator.

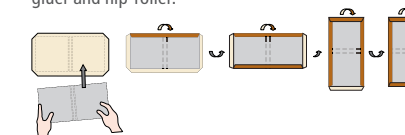

Q-COVER ONE

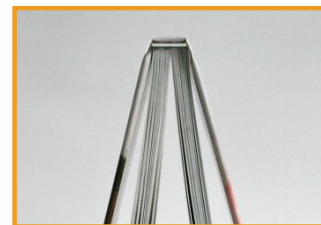

It turns-in one side at a time and folds the corners automatically. The cover is then passed into the nip-roller, output on collector table.

Q-COVER START

Edge turner with vacuum table and guides for spotting the boards on the glued sheet. Suitable for customers who already have gluer and nip-roller.
