

CASEMAKERS

Casemakers for short and medium run production of binders, book covers and paper-over-board items

- Ergonomically Designed with Adjustable Working Height
- Fits into confined space
- One Operator Only
- Fast or No Setup
- Precision and Quality are Guaranteed
- Practical in Design, Versatile in Operation: Ready to Use

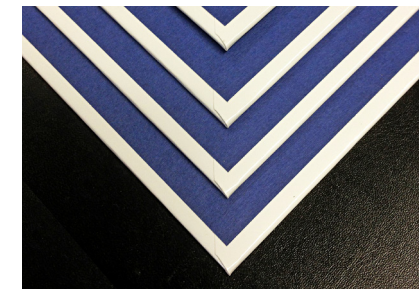

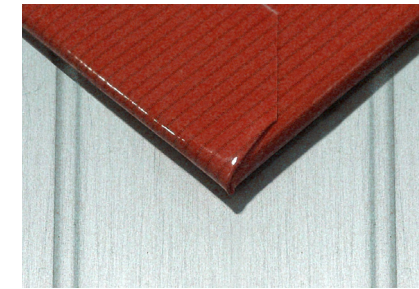

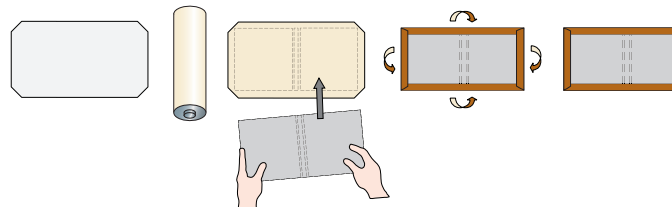

**OVER 400
UNITS
INSTALLED**

Q-COVER FOUR

It turns in all four sides in one pass. Output on collector table at the side of the operator for an immediate view of the finished product.

- Huge Variety of Materials for High-Quality Cases and Covers
- High output, more than 300 pcs/h possible
- Lining Operations on the Same Unit
- Minimum Height of Case 105 mm (4 1/32")
- Maximum Open Flat Case 760x460 mm (30" x 18")
- Wider Formats available, up to 1000 mm width (39")

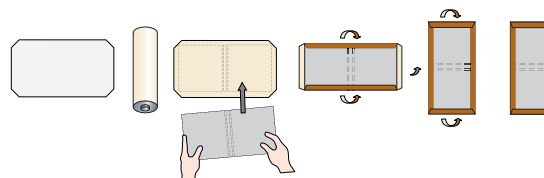

Q-COVER TWO

It turns-in two sides in one pass, the other two sides are turned-in with a second pass. Output on collector table or to the operator.

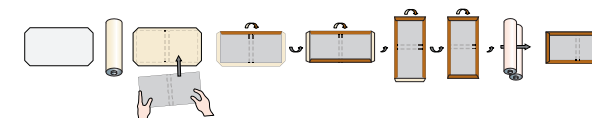

- Offers all the same features as QC4, with two-side turning in only
- Upgradeable to Q-Cover Four, with Automatic Tucking Devices
- Minimum floor space
- Always ready to work ON-DEMAND
- Fast and accurate

Q-COVER ONE

It turns-in one side at a time and folds the corners automatically. The cover is then passed into the nip-roller, output on collector table.

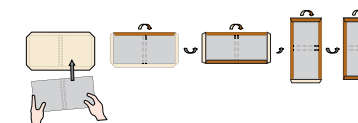

- Available versions for big sizes

Q-COVER START

Edge turner with vacuum table and guides for spotting the boards on the glued sheet. Suitable for customers who already have gluer and nip-roller.

- High quality products with a low investment
